

## Alberta Tomorrow, Government of Canada

**Location:** Edmonton region, Alberta

**Project:** Eco Regions Tour

**Industries:** Film Production, Curriculum Education, Environmental & Natural Sciences

**Release Date:** 2021

### PROJECT SUMMARY

Alberta Tomorrow is an educational tool that helps teachers and students learn about sustainable planning and development within Alberta's ecosystems. In order to expand this program and continue to provide teachers and students with rich, engaging content, Alberta Tomorrow contracted Fuse Consulting Ltd. to create a series of six 360-degree photo tours of Alberta's Natural Regions, including Canadian Shield, Boreal Forest, Foothills, Rocky Mountains, Grasslands and Parkland.

The custom photos tours highlight interactive hotspots focused on key plants, landscape features, animals, and humans' uses of the landscape unique to each ecoregion. The tours also engaged the senses by imbedding audio clips of local bird species.
